PROFILE SUMMARY

Software Engineer with 7+ years of experience building scalable back-end systems and enterprise applications across telecom and healthcare digital platforms. Specialized in designing high-performance APIs, microservices architecture, and database optimization. Experienced in leading engineering teams in large-scale digital platforms, improving system reliability, and delivering production-grade systems for high-traffic applications used by millions of active users.

TECHNICAL EXPERTISE

Backend Engineering: *Node.js, Go, PHP, TypeScript, REST API, Micro-services*
Frontend Development: *React, Angular, HTML, CSS*
Databases & Caching: *MySQL, PostgreSQL, MongoDB, SQL Server, Redis*
Cloud & Infrastructure: *AWS (EKS, EC2, ECR), Docker, Kubernetes, CI/CD*
Testing & Observability: *Jest, Mocha, SonarQube, Kibana, Splunk*

EXPERIENCE

Software Engineer - PT. Bithealth

Jul 2025 - Apr 2026 | Tangerang, Indonesia

- Troubleshoot and resolve production issues through root cause analysis, improving system stability and reducing recurring incidents.
- Improve API performance by optimizing inefficient queries and resolving N+1 query problems.
- Refactor legacy code following clean architecture and engineering best practices.
- Implement backend and frontend improvements including bug fixes and feature enhancements.
- Improve system observability by enhancing application logging and monitoring.
- Improved API response time by up to 70% through database query optimization.

Project: Siloam Hospitals (frontoffice, kairos, payment, queue management, opdadmin)
Tech Stack: Angular, React, Express.js, Typescript, .NET, SQL Server (MSSQL), PostgreSQL, Kibana

Web Development Team Lead - PT. Phincon

Apr 2023 - Apr 2025 | Jakarta, Indonesia

- Led a 10-member team delivering high-performance and scalable API services for 30+ Telkomsel applications.
- Ensured high system reliability and achieved 100% SLA compliance during Non-Functional Testing.
- Collaborated with Product Owners, QA, and DevOps teams to ensure stable production releases.
- Implemented engineering standards, documentation practices, and development workflows to improve productivity.
- Managed sprint planning, team capacity, and backlog prioritization to maintain consistent delivery performance.
- Mentored junior developers and conducted technical reviews to maintain code quality.

Project: MyTelkomsel Web
Tech Stack : Hapi.js, Express.js, React, MySQL, Redis, AWS, Docker, Jenkins, Jira

Fullstack Developer - PT. Phincon

Nov 2021 - Jul 2025 | Jakarta, Indonesia

- Developed and maintained scalable API services for Telkomsel enterprise systems.
- Collaborated with QA and DevOps teams across SIT, UAT, regression, functional, and non-functional testing.
- Built automated unit tests achieving 80%+ coverage to improve code quality and system reliability.
- Optimized backend services and database queries to achieve sub-second API response times.

Project: MyTelkomsel Web, MyTelkomsel Apps, MyTelkomsel Lite
Tech Stack : Hapi.js, Express.js, React, MySQL, Redis, AWS, Docker, Jenkins, Jira

IT Developer - PT. eGoGo Hub Indonesia

Oct 2018 - Oct 2021 | Jakarta, Indonesia

- Built and maintained ERP systems and corporate websites.
- Translated business requirements into scalable, database-driven applications.
- Delivered client-facing solutions and supported production systems used in daily business operations.
- Improved internal workflows and resolved production issues to support business operations.

Project: eGoGo Web & ERP, Dekkson ERP & Loyalty, Hattan Intl, Go-Commerce Builder, Live Integration Dashboard (LID)
Tech Stack : PHP Native, Express.js, React, Go, Dolibarr, MySQL

KEY PROJECT

MyTelkomsel Digital World

Contributed to the development of Telkomsel Digital World, a large-scale digital ecosystem consisting of three main platforms: MyTelkomsel Web, MyTelkomsel App, and MyTelkomsel Lite, serving millions of Telkomsel users across Indonesia.

Siloam Mobility

Worked on the development and maintenance of Siloam Mobility, a digital healthcare platform. Focused on resolving production issues, optimizing backend API performance, and refactoring legacy code to improve system stability while implementing backend and frontend improvements based on user requirements.

EDUCATION

Software Engineering Faculty of Engineering — 2015 - 2019

Universitas Amikom Yogyakarta (3.64/4.00) — Sleman - Indonesia

CERTIFICATION

Cloud Practitioner Essentials (Belajar Dasar AWS Cloud)

Dicoding Indonesia - Januari 2025
