SUMMARY

Senior Software Engineer with 7+ years of enterprise backend and fullstack experience delivering mission-critical systems for telecom and healthcare organizations serving millions of end users. Track record of leading cross-functional engineering teams, achieving 100% SLA compliance under rigorous non-functional testing, and modernizing legacy systems for long-term stability. Seeking a senior engineering or technical lead role with immediate availability for relocation and relevant experience supporting enterprise-scale, high-availability production systems.

TECHNICAL EXPERTISE

Backend Engineering	Node.js, Go, PHP, TypeScript, REST API, Microservices
Cloud & Infrastructure	AWS (EKS, EC2, ECR), Docker, Kubernetes, CI/CD
Databases & Caching	MySQL, PostgreSQL, MongoDB, SQL Server, Redis
Testing & Observability	Jest, Mocha, SonarQube, Kibana, Splunk
Frontend Development	React, Angular, HTML, CSS

PROFESSIONAL EXPERIENCE

Software Engineer — PT. Bithealth

Jul 2025 – Apr 2026

Tangerang, Indonesia

- Optimized inefficient database queries and resolved complex N+1 query problems, improving API response time by up to 70%.
- Resolved critical production issues through deep root-cause analysis, improving system stability and reducing recurring operational incidents.
- Refactored legacy codebases and resolved code smells, raising unit test coverage from 70% to 90%+ and improving long-term maintainability.
- Improved system observability by enhancing application logging and monitoring.
- Implemented backend and frontend enhancements, bug fixes, and critical features across multiple hospital workflows.

Project: Siloam Hospitals (frontoffice, kairos, payment, queue management, opdadmin)

Tech Stack: Angular, React, Express.js, TypeScript, .NET, SQL Server (MSSQL), PostgreSQL, Kibana

Web Development Team Lead — PT. Phincon

Apr 2023 – Jul 2025

- Led a cross-functional team of 10 engineers (5 backend, 5 frontend) designing, developing, and delivering high-performance API services and scalable features across 30+ Telkomsel applications.
- Re-architected a core service to cut end-to-end response time from 10 seconds to under 1 second, directly improving experience for millions of active users.
- Streamlined the release pipeline to reduce deployment time from 4 hours to 1 hour, accelerating delivery cadence across 30+ applications.
- Achieved 100% SLA compliance during rigorous Non-Functional Testing (NFT), ensuring high availability and stability for millions of active users.
- Streamlined engineering workflows by implementing strict code review standards, technical documentation practices, and agile sprint planning using Jira.
- Managed sprint capacity, technical debt, and backlog prioritization, aligning engineering milestones with Product Owners, QA, and DevOps teams for smooth production releases.

Project: MyTelkomsel Web

Tech Stack: Hapi.js, Express.js, React, MySQL, Redis, AWS, Docker, Jenkins, Jira

Consultant Fullstack Engineer — PT. Phincon

Nov 2021 – Apr 2023

- Developed and maintained scalable backend API services and frontend modules for core enterprise systems including MyTelkomsel Web, App, and Lite platforms.
- Collaborated with QA and DevOps teams across SIT, UAT, regression, functional, and non-functional testing.
- Built automated unit tests achieving 80%+ coverage to improve code quality and system reliability.
- Optimized backend services and database queries (MySQL, Redis) to significantly reduce latency, achieving sub-second API response times under high traffic loads.

Project: MyTelkomsel Web, MyTelkomsel Apps, MyTelkomsel Lite

Tech Stack: Hapi.js, Express.js, React, MySQL, Redis, AWS, Docker, Jenkins, Jira

IT Developer — PT. eGoGo Hub Indonesia

Oct 2018 – Oct 2021

- Architected and developed a live multi-marketplace management platform, successfully synchronizing products, inventory, and orders across 7 major e-commerce marketplaces in real time.
- Engineered and delivered 5 custom Enterprise Resource Planning (ERP) systems and 9 corporate web platforms from scratch for diverse external clients, ensuring strict adherence to business requirements and deadlines.
- Delivered client-facing e-commerce and logistics solutions (including Go-Commerce Builder and Live Integration Dashboard) that streamlined internal workflows and operational efficiency.
- Troubleshoot and resolved critical production issues, minimizing downtime and maintaining data integrity across integrated client systems.

Project: eGoGo Web & ERP, Dekkson ERP & Loyalty, Hattan Intl, Go-Commerce Builder, Live Integration Dashboard (LID)

Tech Stack: PHP Native, Express.js, React, Go, Dolibarr, MySQL

KEY PROJECTS

MyTelkomsel Digital World

Contributed to Telkomsel Digital World, a large-scale digital ecosystem spanning MyTelkomsel Web, App, and Lite, serving millions of Telkomsel users across Indonesia.

Siloam Mobility

Developed and maintained Siloam Mobility, a digital healthcare platform, focused on resolving production issues, optimizing backend API performance, and refactoring legacy code to improve system stability.

EDUCATION

B.Eng. in Software Engineering, Faculty of Engineering 2015 – 2019

Universitas Amikom Yogyakarta — GPA 3.64 / 4.00 — Sleman, Indonesia

CERTIFICATION

AWS Cloud Practitioner Essentials — Dicoding Indonesia, January 2025

LANGUAGES & AVAILABILITY

English: Professional working proficiency

Bahasa Indonesia: Native

Availability: Immediate. Open to relocation to Jakarta, Bandung, Malaysia, Singapore, Middle East (UAE, Saudi Arabia, Qatar, and elsewhere in the region); willing to complete any required credential attestation for work visa processing.
